The Mountain Lion update, or OS X 10.8, was released to the world on the 17th of July to replace the previous operating system, Lion. Mountain Lion features a variety of new enhancements including hand-off support for iOS 5 and iCloud integration. This means that it is now easy for users to switch between their computers and their Apple products seamlessly! You can download an installation file that will install Mountain Lion onto your machine without any fuss or hindrances from the website below! Click here to read more... _____ Enjoy this article?
